PREFACE

Indian Censuses have been collecting information not only on the social and demographic characteristics but also on the economic activity of the individual. The 1971 Census of India gathered information on the economic activity of the individual by eliciting answers to two specific questions on Main Activity and Secondary work. The nature of work, nature of industry, place of work, name of establishment and class of worker have been ascertained for the working population in the non-agricultural sector. For non-workers the type of activity has been elicited.

The economic tables are presented under B series in this volume. There are 9 tables (B I to B IX) with sub-parts in some of them. The tables are based on the main activity of the individual. Two of the tables (B VIII and B IX) relate exclusively to non-working population. One table (B VII) presents data on secondary work. A preliminary note has been given explaining the concepts adopted in 1971 census for gathering information on economic activity of the population. A number of maps/charts have been included to illustrate the data presented in the tables. Each table is preceded by a Fly Leaf which explains the content of the table that follows. It is hoped that the statistics presented in this volume would be useful to all those interested in the economic study of the population.

In the preparation of the tables presented in this volume, I have been assisted by Sri P.L. Samy, Assistant Director of Census Operations and Sri D. Santhanam, Statistical Assistant of Pondicherry office and Sri T.R. Rajagopalan, Deputy Director of Census Operations, Sri M. Panchapakesan, Investigator, Sri C.K. Somasundaram, Senior Technical Assistant, Sri S. Packiaraj, Tabulation Officer, Smt. A.M. Mangayarkarasi, and Sri R. Srinivasan, Research Assistants, Smt. M.S. Kasthuri and Kum. S. Prema, Upper Division Clerks, Smt. V. Manimekalai, Smt. R. Saroja bai, Sri K. Sridharan, Sri S. Somasundaram and Sri S. Natarajan, Assistant Compilers of the Madras office. The maps and charts presented were drawn in the Cartography section of my office consisting of Sri A. Rajamani, Artist, Sri N. Chandran and Sri R. Selvanambi, Draftsmen and Sri M. Kothandaraman, Computor. I thank the officers and staff above for their able assistance and co-operation in bringing out this publication.

My thanks are due to Sri K.K. Chakravorty, A.R.G. (Census) in the Registrar General's office and his staff for their co-operation in the scrutiny of the tables and clearance for publication. I wish to place on record my gratefulness to Sri A. Chandrasekhar, I.A.S., former R.G. and Sri R.B. Chari, I.A.S., the present R.G., India for their consistent support given to me in bringing out the 1971 census results in print.

Lastly, I convey my thanks to the Manager, Govt. of India Press, Coimbatore and his officers and staff for the co-operation extended in the printing of this volume.

PRELIMINARY NOTE

In this volume, the General Economic Tables (B) Series compiled from the data collected during the 1971 Census enumeration are presented. This is almost similar to that published in 1961. The data have been presented in 9 different tables, (B-I to B-IX) and these have been prepared on the basis of economic questions 16 and 17 of the 1971 Census Individual Slip. This concepts used in the tables are explained in detail in the fly leaf to each table. The tables have been prepared on a full count basis.

Though a question on 'Profession' or 'means of living' was included in the Pondicherry Censuses from 1901, statistics on economic activity is not available for Censuses prior to 1961. Systematic compilation of data on working and non-working population was made only from 1961 Census. Hence a comparison is possible only of data of 1961 and 1971 Censuses.

Economic questions have been included in every previous Census in India, the importance and scope of economic data increased and the concepts had undergone changes during the years. A major departure was made in 1961 Census when stress was laid for the first time on actual work irrespective of income to decide the economic activity of an individual. This was in clear contrast to all previous Censuses when income or economic independence was the criterion. This change is a significant aspect in relation to those who do not work but have income and those who work but do not have sufficient income. The data compiled in 1961 divided the population into workers and non-workers.

Persons engaged in seasonal occupations like cultivation, livestock, household industry etc., were treated as workers, if they had some regular work for more than one hour per day throughout the greater part of the working season. For those persons who were regularly engaged in any trade, business or commerce, profession, service, the basis for work would be satisfied if they were employed during any of the fifteen days preceding the day of enumeration. A regular worker who was absent from work during the fifteen days prior to the enumeration date due to illness or other causes was included as worker. Work included not only actual work but effective supervision and direction. Those who were offered work but had not actually joined work were not treated as workers. Apprentices i.e. persons under training also were regarded as workers irrespective of whether they received wages or not. An adult woman engaged in household duties but not engaged in productive work to augment the family income was considered as a non-worker. Public or Social worker or a political worker actually enagaged in furthering the political objectives of his party was treated as a worker. Under-trial prisoners and persons in jail who were not convicted by a court of law were considered as workers if they were engaged in work before their arrest.

Temporary inpatients of hospitals or sanatoria were treated as workers if they were engaged in work prior to their admission to these institutions. Women who were solely attending to household chores, however useful the work may be, were considered as non-workers. An important aspect of 1961 Census was that 'work' became the criterion instead of 'income' and as such persons like pensioners, rent or royalty receivers earning an income but not participating in any productive work were not considered as workers unless they were also engaged in productive work in agriculture, industry, trade or commerce etc. Workers were classified into 2 agricultural and 7 non-agricultural groups. Non-workers were classified into 8 different types.

In 1971 Census every person was asked what his main activity was, that is, how that person was engaged mostly. All persons were divided into two broad streams of main activity, viz., (1) as workers and (2) as non-workers according to the type of main activity that the persons returned.

The answers to this question classified them as workers and non-workers. The workers were further classified for their main activity as Cultivator, Agricultural Labourer, Worker at Household Industry or other workers engaged in non-household Industry, trade, profession or service. The non-workers (according to main activity) were categorised into 7 types—as Students, household duties, rentiers or retired persons, dependents, beggars, vagrants etc., inmates of institutions and other non-workers.

The other question, No.17, elicited information about the Secondary work of each individual—irrespective of whether he has returned some work as his main activity against Q.16 a (i) or has been returned as basically non-working against Q.16 a (ii).

A worker in 1971 has been defined as a person whose main activity is participation in any economically productive work by his physical or mental activity. Work involved not only actual work but also effective supervision and direction. The reference period is one week prior to the date of enumeration in the case of regular work in trade, profession, service or business. If a person had participated in any such regular work on any one of the days during the reference period and this was returned as his main activity, the person was classified accordingly. A person who normally works but was absent on account of illness or travel, holiday etc. was treated as engaged in regular werk in which he was engaged prior to his temporary absense. Apprentices with or without stipend or wages were considered as economically active and recorded as workers. A person who was merely offered work but had not actually joined in it, was not treated as engaged in work. A person working in seasonal occupations like Cultivation,

2—1 Census/TN&P/75

livestock, rearing household industry and so on was treated as a worker, if the person had some regular work in the course of the last one year even though the person was not economically active in the week prior to enumeration. It is likely that even when a person is engaged in some other work during the period of one week prior enumeration, the main activity may be cultivation, agricultural labour or some other work attended to normally by him in the course of the year. Then the main activity is properly ascertained and recorded in such cases. A man or woman engaged primarily in household duties such as cooking or performing one's own household duties or a boy or girl who is primarily a student attending school, even if such a person helps in the family economic activity but not as a *full-time* work was not treated as a worker and was considered only as a non-worker under main activity. On the other hand, if a person was primarily engaged in some economic activity but at the same time attended a night school etc., that person was considered as a worker for the main activity and categorised accordingly. Under-trial prisoners and persons in jail who had not been convicted were also treated as workers, if they were engaged in economically active work before they were apprehended. A person who merely received an income, such as a rent-receiver or pensioner who does not work for the income, was not considered as economically active unless that person was also engaged in some economic activity.

All the workers further divided into nine industrial categories, two agricultural and seven non-agricultural. The details of these categories will be found in the Fly leaf of Table B-I. Non-workers like students, household duties, pensioners, beggars, inmates of institutions etc., were grouped under seven different categories.

Q.No. 16 Main Activity was put to find out whether the citizen is a worker or not, and if a worker, whether a cultivator or agricultural labourer or engaged in any household Industry or in any other work. Persons whose main activity was one other than cultivation or agricultural labour, details were ascertained as to the place of work, the name of establishment, the nature of industry, trade, profession or service, description of work and lastly the class of worker. The secondary work of every person in addition to main activity was ascertained in Q. 17. Detailed information similar to Q.16 (b) has been obtained for this question also. The activity on which the major part of a person's time was spent was treated as main activity. The question on secondary work was asked of every person irrespective of whether he has returned some work as his main activity or has returned himself under any of the basically non-working categories (as his main activity). Even students and persons engaged mainly in household duties might participate in some other economic activity and such participations are considered as secondary work of these persons. Participation in work that goes to augment the income of the individual was treated as economic activity. While the first question took into account the main activity of the individual based on how he engaged himself mostly, the second question was intended to cover secondary work, possibly part-time. Whether the secondary work was (i) Cultivation (ii) Agricultural Labour (iii) Household Industry or (iv) Other work also recorded. The main classification of worker has been done on the basis of the answer recorded under the question on main activity.

Both in 1961 and 1971 Censuses, the classification of economic activity of the population has been based on "work" instead of "income" of an individual. The definition of work in both the Censuses are almost similar with slight changes. The period of reference in 1961 for considering a person as a worker in the case of seasonal work has been that he should have a minimum regular work of one hour per day throughout the greater part of the working season whereas in 1971, it would be sufficient if that person had some regular work in the course of the last one year though the person may not be economically active during the work prior to enumeration. In the case of persons engaged in regular work of trade, commerce, business, profession or service, the period was fifteen days prior to the date of enumeration in 1961 while in 1971, the period was restricted to a week prior to enumeration. In both the Censuses, temporary absence from work due to illness, travel or holiday etc. during the period of reference was not considered as a bar for being considered as a worker.

In 1961, special emphasis was not given for Secondary work as no separate question was asked of each individual. In 1971, all the activities of an individual was ascertained and then he was asked to specify that work on which he spent most of his time. This work was considered as his principal work. Then that work on which he spent most of his spare time after attending to the principal work was considered as his Secondary work. In the current Census of 1971, the principal work was ascertained by a separate question and secondary work by another question. The latter procedure ensured precise information on main Activity (principal work) without confusion but at the same time (collected) information on secondary work of the individual. In 1961, persons who were primarily attending to household duties or were students, if they contributed to augment family income by helping in household industries or trade or business conducted by an household, were considered economically active and regarded as workers. In 1971 Census, however, these persons were considered as non-workers for principal activity and as economically active persons for secondary work. While the 1961 concept, had a boosted figure under workers, the stricter 1971 concept had a realistic approach of the data on working population.

The Primary Census Abstract and the Economic Tables are also based on the main activity except Table B-VII and its appendix which present data on persons engaged in secondary work. An extract of the instructions issued in 1971 Census relating to economic questions is given in Appendix with a view to help the reader to assess the precise significance of the data collected and presented in the Economic Tables.

The economic tables presented in this volume are detailed below:—

Economic Tables—

B-I	Part-A	Workers & Non-workers according to main activity classified by sex and age groups.
	Part-B	Female workers and non-workers according to main activity classified by marital status and age groups.
B-II		Workers and non-workers in cities and non-city urban areas according to main activity by sex and age groups.
B-III	Part-A	Classification of workers and non-workers according to main activity by educational levels in urban areas only.
	Part-B	Classification of workers and non-workers according to main activity by educational levels in rural areas only.
B-IV	Part-A	Industrial classification of persons at work other than at cultivation as main activity by sex and divisions, major groups and minor groups.
	Part-B	Industrial classification of workers in manufacturing, processing, servicing and repairs on household industry basis as main activity by sex and class of workers.
	Part-C	Classification of workers in non-household industry, trade, business, profession or service as main activity by class of workers, age and sex.
	Part-D	Industrial classification by sex and class of workers of persons at work in non-household industry, trade, business, profession or service as main activity.
B-V	Part-A	Occupational classification by sex of persons at work according to main activity other than cultivation.
	Part-B	Occupational classification by sex and class of workers in non-household industry, trade, business, profession or service as main activity.
B-VI	Part-A(i)	Occupational classification of persons at work according to main activity other than cultivation classified by sex and educational levels in urban areas only.
	Part-A(ii)	Occupational classification of persons at work according to main activity other than cultivation classified by sex and educational levels in urban areas only.
	Part-B(i)	Occupational classification of persons at work according to main activity other than cultivation by sex and age groups in rural areas only.
	Part-B(ii)	Occupational classification of persons at work according to main activity other than cultivation classified by sex and educational levels in rural areas only.
B-VII		Secondary work, i.e. persons having main activity (i) cultivators, (ii) agricultural labourers, (iii) household industry, (iv) non-household Industry, trade, business or service and (v) non-workers classified by sex and by secondary work as (i) cultivators, (ii) agricultural labourers, (iii) household industry, (iv) non-household industry, trade, business or service.
B-VIII		Persons classified as non-workers according to main activity cross-classified by sex, age groups and type of activity.
B-IX	Part-A	Non-workers categorised as 'others' aged 15 and above classified by sex, age groups and educational levels in urban areas only.
	Part-B	Non-workers categorised as 'others' aged 15 and above classified by sex, age groups and educational levels in rural areas only.

Question 16: Main Activity

78. Every person will be asked what his main activity is, that is, how he engages himself mostly. For the purpose of this question, all persons will get themselves divided into two broad streams of main activity namely, (1) as workers and (2) as non-workers according as the type of main activity that the person returns himself as engaged in mostly.

79. *'Worker' defined*: A 'worker' is a person whose main activity is participation in any economically productive work by his physical or mental activity. Work involves not only actual work but effective supervision and direction of work.

80. *Reference periods*: The reference period is one week prior to the date of enumeration in the case of regular work in trade, profession, service or business. If a person had participated in any such regular work on any one of the days during this reference period and this has been returned as his main activity, the person will be categorised accordingly. A person who normally works but had been absent from work during this reference period on account of illness or travel, holiday, temporary breakdown, strike etc., the person should be treated as engaged in regular work in which he would have otherwise been employed but for his temporary absence. Persons under training such as apprentices with or without stipends or wages should be considered as economically active and recorded as working. A person who has merely been offered work but has not actually joined it, is not to be treated as engaged in work.

81. There are certain types of works which are not carried on throughout the year such as cultivation, livestock keeping, plantation work, some types of household industry, etc. A person's main activity should be ascertained with reference to such work in the last one year even if he was not economically active in the week prior to enumeration. It is likely that even when a person is engaged in some other work during the period of one week prior to the date of enumeration, the main activity of the person may be cultivation, agricultural labour or some other work attended to normally by him in the course of the year. Care must be taken to see that the main activity is properly ascertained in such cases. For example, a person's main activity may be agricultural labour and in the week prior to enumeration he may be engaged as a sugarcane factory labourer or as a road coolie. He should be categorised for his main activity as agricultural labourer only as returned by him as he engages himself mostly in that work and the other work should be treated as his subsidiary work.

82. A man or woman who is engaged primarily in household duties such as cooking for own household or performing one's own household duties or a boy or a girl who is primarily a student attending institution, even if such a person helps in the family economic activity but not as a full-time worker should *not* be treated as a worker for the main activity. On the other hand, if a person is primarily engaged in some economic activity but at the same time does also attend to some household chores or attends a night school etc., he or she should be treated basically as a worker for the main activity and categorised accordingly.

83. A person who merely receives an income such as rent-receiver or a pensioner who does not have to work for receiving the income, will not be treated as economically active unless the person is also engaged in some economic activity and if that activity is returned as the main activity of the individual.

Q. 16(a) Broad Category (i) Worker (C, AL, HHI, OW) (ii) Non-worker (H, ST, R, D, B, I, O).

84. The main activity returned by the person will entitle him to be categorised either as a worker in 16 (a) (i) or as a non-worker under 16 (a) (ii).

16(a)(i) Worker (C, AL, HHI, OW).

85. Where the main activity of a person qualifies him to be treated as a worker he should be further categorised according to the type of work and one of the appropriate abbreviations indicated against this question should be entered in the box provided for the purpose. If the person is not engaged in any economic activity an 'X' should be noted in the box. The abbreviations to be used for workers are explained below:

C: CULTIVATOR

86. For a person who returns his main activity as working as a cultivator, the abbreviation 'C' should be used.

87. *Definition of Cultivator*: For purposes of the census a person is working as Cultivator if he or she is engaged in cultivation by oneself or by supervision or direction in one's capacity as the owner or lessee of land held from Govt. or as a tenant of land held from private persons or institutions for payment of money, kind or share.

88. Cultivation involves ploughing, sowing and harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi etc., and pulses, raw jute and kindred fibre crop, cotton etc., and other crops such as sugarcane, groundnuts, tapioca, etc., and does not include fruit-growing, vegetable-growing or keeping orchards or groves or working of plantations like tea, coffee, rubber, cinchona and other medicinal plantations.

89. A person who merely owns land but has given out land to another person or persons for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation of land, will not be treated as working as cultivator. Similarly, a person working in another person's land for wages in cash, kind or share (Agricultural labourer) will not be treated as cultivator in this question.

AL: AGRICULTURAL LABOURER

90. A person who returns his main activity as engaged as agricultural labourer, the abbreviation 'AL' should be used in the box.

91. *Definition of an Agricultural Labourer*: A person who works in another person's land for wages in money, kind or share should be regarded as an agricultural labourer. He has no risk in the cultivation but he merely works in another person's land for wages. The labourer could have no right of lease or contract on land on which he works.

HHI: HOUSEHOLD INDUSTRY

92. For a person who returns his main activity as engaged in some production, processing, servicing or repair of articles of goods such as, say, handloom weaving, dyeing, carpentry, *bidi* rolling, pottery manufacturer, bicycle repairing, blacksmithy, tailoring etc., it has to be ascertained if it is a household industry, and if so, it should be indicated by the abbreviation 'HHI' in the box.

93. *Definition of a Household Industry*

A Household Industry is defined as an industry conducted by the Head of the household himself/herself and/or mainly by the members of the household at home or within the village in rural areas and only within the premises of the house where the household lives in urban areas. The industry should not be run on the scale of a registered factory.

94. The main criterion of a Household Industry is the participation of one or more members of a household. The criterion should apply to urban areas too. Even if the industry is not actually located at home in rural areas there is greater possibility of the members of the household participating even if it is located anywhere within the village limits. In the urban areas where organised industry takes greater prominence, the Household Industry should be confined to the precincts of the house where the participants live. In urban areas even if the members of the household by themselves run an industry but at a place away from the precincts of their home, it will not be considered a household industry. It should be located within the precincts of the house where the members live.

95. A Household Industry should relate to production, processing, servicing, repairing or making and selling (but not merely selling) of goods. It does not include professions such as a pleader or doctor or barber, musician, dancer, waterman, *dhobi*, astrologer, etc., or merely trade or business, even if such professions, trade or services are run at home by members of household. A list of a few typical Household Industries is appended to these instructions at Appendix III.

96. Sometimes it is likely that the person who may not be working in his own Household Industry may be working as a petty employee in another Household Industry. You should, therefore, enquire whether the person who is not working in his own Household Industry is working in any other Household Industry as an employee and record as per instructions given above.

OW: Other Workers

97. If a person gives his main activity as engaged in any other work which is not cultivation, agricultural labour or household industry, this may be indicated by merely noting 'OW' in the box. The type of workers that may come under the 'Other Workers' category are factory workers, those working in trade or transport, all Government servants, municipal employees, teachers, mining workers, political or social workers, building labourers, etc., etc. In effect, all types of economic activity not covered by cultivation, agricultural labour or household industry will come under this residual category. Workers engaged in plantation or forestry should not be treated as cultivators or agricultural labourers but as 'Other workers'.

98. Further details pertaining to this 'Other' category of workers, as also those engaged in household industry, will be recorded in the subsequent sub-parts (b) to (f) of question 16.

16(a) (ii) Non-worker (H, ST, R, D, B, I, O).

99. As was stated earlier, question 16 is intended to ascertain the main activity of every individual whether he or she is economically active or not. While 16 (a) (i) helps to broadly categorise all those who have returned some work as their main activity, 16 (a)(ii) will help to categorise those whose main activity is not engaged in any economically productive work, but are basically non-workers. These may be categorised under seven broad heads whose abbreviations are indicated against this question. The appropriate abbreviation will have to be entered in the box provided. The abbreviations are explained below:

H: Household Duties

100. This covers all those persons basically engaged in unpaid home duties doing no other work, or even if such a person may also be participating in some other work, it is not to the same extent as a whole-time worker and if the person has returned his or her main activity as attending to household duties. The main activity of such a person should be entered as 'H'. If a person whose main activity is attending to household duties, also engages oneself in some other economic activity such as helping in family cultivation or preparing cowdung cakes at odd times for sale etc., that economic activity will be covered as secondary work under question 17. On the other hand, a woman who works primarily as a factory worker or a plantation labourer or an agricultural labourer or in some office or shop etc., and also attends to household duties, obviously her main activity will be the economic activity in which she is mostly engaged in and should not be categorised as 'H' for her main activity in this question. She should have been treated basically as a worker and her main economic activity should have been recorded against 16 (a) (i).

ST: Student

101. This refers to those whose main activity is returned as a student. This will cover all full-time students or children attending school. Even if such persons participated in some work but not to the same extent as a full-time worker, by merely helping casually as an unpaid family worker in family cultivation, household industry, trade or business, they should be treated primarily as students, if that is their main activity. 'ST' should be entered in the box. The other economic activity, if any, that such persons attend to will be reflected under question 17 as secondary work.

R: Retired person or a Rentier

102. A person who has retired from service and is doing no other work *i.e.* not employed again in some full-time work or does not engage himself in some other work as cultivation, in business, trade, etc., or a person who is a rentier or living on agricultural or non-agricultural royalty, rent or dividend, or any other person of independent means for securing which he does not have to work, will come under this category. 'R' should be noted in the box for a person coming under this category.

D: Dependent

103. This category will include all dependents such as infants or children not attending school or a person permanently disabled from work because of illness or old age. If a girl or an old woman attends to household duties she should be categorised under 'H' for her main activity rather than 'D'.

Dependents will include all non-workers even if able-bodied who have no other activity coming under any of the categories of non-workers and who are not seeking any work either but are purely dependent.

B: Beggars etc.

104. This will cover beggars, vagrants or such cases as independent women without indication of source of income and those of unspecified sources of subsistence and who are not engaged in any economically productive work.

I: Institutions

105. This will cover convicts in jails or inmates of a penal, mental or charitable institutions, even if such persons are compelled to do some work such as carpentry, carpet weaving, vegetable growing etc., in such institutions. An under-trial prisoner in a jail should not, however, be brought

under this category but has to be indicated according to the main activity he was engaged in before he was apprehended. Inmates of such institutions will be noted as 'I'.

O. OTHER NON-WORKERS

106. This will include all non-workers who may not come under any of the six categories above but are seeking work, they should be noted as 'O' in the box. A boy or girl who has completed education or has stopped studying and is seeking work, will come under this category. If a person is merely spending his time at home as dependent and is not doing any work and is not seeking any work will come under 'D' rather than 'O'. A person irrespective of age and whether educated or not, if he reports that he is not engaged in any other activity but is seeking work will come under this category.

107. If the main activity of the person who is enumerated does not qualify a person to be treated as a worker and he does not fall under any of the four broad categories of workers covered by 16 (a) (i) and an 'X' has been put in the box against that question, then he must necessarily be categorised under any one of the seven broad types of non-workers and the appropriate abbreviation entered in the box opposite to question 16 (a) (ii). Conversely if a person has already been treated as a worker and his main activity has been indicated in the box against question 16 (a) (i), then question 16 (a) (ii) will not apply to the person and an 'X' should be put in the box against question 16 (a) (ii). Thus 16 (a) (i) and 16 (a) (ii) are mutually exclusive.

Q. 16 (b) to (f)

108. These sub-parts of question 16 will have to be filled only to describe the details of the household industry or other work indicated against question 16 (a) (i). If the main activity has been shown as 'C' or 'AL' against 16 (a) (i), there is no need to give the details of the cultivation or agricultural labour in these sub-sections.

109. Similarly, if the main activity of an individual has been returned as a non-worker against 16 (a) (ii), sub-sections (b) to (f) will not apply and a 'X' may be put right across all these questions.

Q. 16 (b): Place of work (Name of village/town)

110. Ascertain from each person who is already taken as a worker other than in cultivation or agricultural labour *i.e.* question 16 (a) (i) has been answered as HHI or OW, the village or town where he or she works. If the place of work is the same as the village or town of enumeration, write 'PL'. In all other cases you should write the name of the place fully. If a person has no fixed place of work such as, say, a travelling vendor of vegetables or a pedlar or a rickshaw puller who may go from one village or town to another, note 'No fixed place of work'. If he works in one particular town or village that should be noted.

Q. 16 (c): Name of Establishment

111. This question and the subsequent sub-sections of question 16 need not be answered for cultivators and agricultural labourers who are already noted as 'C' or 'AL' against question (16) (a) (i).

Record here the exact name of the factory, firm, workshop, business house, company, shop, office etc., and in respect of public offices you should clearly indicate whether they are Central or State Government or local body offices, etc. If the establishment does not have any definite name such as, say, in the case of a household industry like hand pounding of rice, gur making, bee keeping, handloom weaving, potter's house, blacksmithy etc., note 'No particular name'.

Q. 16 (d): Nature of Industry, Trade, Profession or Service

112. The answer to this question will have to be adequately precise to enable proper classification of the sector of economy in which the person is working. The sector of economy in which a person works may relate to (i) Plantation, Forestry, Fishing, Livestock etc. (ii) Mining and/or Quarrying (iii) Manufacturing (iv) Construction (v) Electricity, Gas or Water Supply (vi) Transport and Communications (vii) Trade and Commerce (viii) Professions and Services. Full details of the type of industry, trade, profession or service in which the person is engaged will have to be recorded here. To help you to appreciate the details that may have to be furnished to classify the economic activity appropriately, substantial description of various economic activities are furnished in Appendix IV, categorised under certain broad classifications. The list in Appendix IV is not exhaustive. You shall have to describe the nature of Industry, Profession, Trade or Service whatever it is, in as precise a detail as possible.

Q.16 (e) : Description of work

113. This question has to be filled up for all persons for whom the main activity is shown as 'HHI' or 'OW' in question 16 (a) (i) and for whom you should have also to answer the other sub-sections of question 16. Under this question, the description of the actual work that the person enumerated is doing is to be recorded irrespective of which type of industry, trade, profession or service he may be working and which is already recorded under question 16 (d). His actual work should also be given in sufficient detail. If for example a person is merely recorded as, say, clerk with no other details, it will be impossible to properly categorise him as to the type of work he does. He may be a clerk attending to correspondence or book keeping or accounting. Similarly if a person were merely to be recorded as a mechanic, it will not help to determine what type of mechanic—electrical mechanic or a motor mechanic or a locomotive mechanic, etc., he is. The description of the actual work done by a person should be ascertained in adequate detail and recorded against this question.

114. To guide you in answering question 16 (e), the types of particulars that need to be ascertained in respect of a few typical occupations are given in Appendix V.

Appendix V is by no means exhaustive. This just illustrates the need to ascertain the full details of the particulars of work performed by an individual for being recorded against question 16 (e).

115. It has been found in the past that substantial number of persons are recorded merely as general labourers. It is necessary to make a probe and find out in which type of work he is mostly engaged as a labourer such as, say, a road coolie, a loader or unloader at a market, a construction labourer, etc.

116. For those in Military service it is enough if it is merely noted as 'in the service of the Central Government'. Other details need not be given.

General:

117. There need be no confusion as to the scope of 16 (d) and 16 (e). 16 (d) would represent the nature of industry, trade, profession or service i.e. the field of economic activity in which a person is engaged in work and 16 (e) represents the occupation or the actual work that the person does in the industry, trade, profession or service in which he is engaged. Thus, for example the answer to question 16 (d) may be say Cotton Textile manufacture and the answer to question 16 (e) may be Chemical Engineer in that industry or a clerk or an accountant in that industry or a labourer in that industry or a truck driver or the managing director of that industry and so on. Similarly, in question 16 (d) the nature of service may be some department of the State Government Service and in question 16 (e) the description of work may be a clerk or an accountant,

a Director of the Deptt., jeep driver in the Deptt. etc., etc. Again say, against question 16 (d) the answer may be private medical practice and in 16 (e) may cover orthopaedic surgeon or nurse or a sweeper etc., working in that private medical practitioner's nursing home. The sample answers furnished in the specimens (Appendix VI) at the end of this book. the Industrial and Occupational lists in Appendices IV & V and the instructions given by your superior Census Officers may help you to clear any doubts you may have in your mind regarding the scope of questions relating to Nature of Industry, Trade, Profession or Service covered by question 16 (d) and the description of actual work of the individual enumerated covered by question 16 (e).

Q. 16 (f): Class of Worker

118. For a person who is—

(i) an Employer, that is, who hires one or more persons in his work described in question 16 (e), write more ER

(ii) an Employee, that is, who does his work described in question 16 (e) under others for wages or salary in cash or kind, write EE

(iii) a Single Worker, that is, who is doing his work described in question 16 (e) without employing others except casually, and without the help of other members of the family except casually and a participant in work as members of co-operatives, write SW

(iv) a Family Worker, that is, who is doing his work described in question 16 (e) in a family enterprise alongwith other members of the family without wages or salary in cash or kind write FW

For a person for whom an 'X' is put in question 16 (d) and 16 (e) put an 'X' in this question also.

Explanation:

119. An Employer is a person who has to employ other persons in order to perform the work entered in question 16 (e). That is to say, such a person is not only responsible for his own personal work but also for giving work to others in business mentioned in question 16 (e). But a person who employs domestic servants for household duties or has subordinates under him in an office where he is employed by others, is not an employer, even if he has the power to employ another person in his office on behalf of his own employer or employers.

120. An Employee is a person who usually works under some other person for salary or wages in cash or kind. There may be persons who are employed as managers, superintendents, agents, etc., and in that capacity employ or control other workers on behalf of their own employers. Such persons are only employees, as explained above, and should not be regarded as employers.

121. A Single Worker for the purpose of question 16 (f) is a person who works by himself. He is not employed by any one else and in his turn does not employ anybody else, not even members of his household except casually. This definition of a Single Worker will include a person who works in joint partnership with one or several persons hiring no employees, and also a member of a producer's co-operative. Each one of the partners or members of such producers' co-operatives should be recorded as 'Single Worker'.

122. A family Worker is a member who works without receiving wages in cash or kind, in an industry, business, trade or service. For example, the working members in a family of *Dhobies* where they all participate and each does not receive wages separately will be family workers. There may be family workers in industry, trade or professions as well. For the purpose of this definition members of a family may be drawn from beyond the limits of the household by ties of blood or marriage. The family worker may not be entitled to a share of the profits in the work of the business carried on either by the person or Head of the Household or other relative.

123. Members of the household who help solely in household duties should not be treated as family workers.

124. In the case of persons engaged in household industry *i.e.*, in the case of persons for whom the answer to question 16 (a) (i) is 'HHI,' there will be three classes of workers *viz.*, Family worker, Single Worker and Employee. There will be no Employer. Household industry by its very definition is conducted by the head of the household himself or/and other members of the household, the role of hired workers being secondary. If the head alongwith the members of the household is working in a household industry employing hired workers, the head and other members who are working should be treated as 'Family workers'. If the head alone is working with the assistance of hired worker(s) whose role would be secondary as indicated above, he would be treated as a 'single worker'.

Some illustrations for filling the questions 16 or 17 are given in Appendix VI.

Q. 17: Secondary Work

125. This question should be asked of every person whether he has returned some work as his main activity against 16 (a) (i) or had returned himself under any of the basically non-working categories against question 16 (a) (ii). As was noted earlier, 16 (a) (ii) will cover cases like persons performing household duties or students who may not be engaged in any other economically productive work at all, as also those who, though basically are performing household duties or students etc., for the purpose of their main activity, still participated in some other economic activity such as helping the household in several items of work, as in cultivation or in household industry or in looking after the cattle, in attending to family business etc. but not to the extent as a full-time worker. Such participation will be considered as secondary work of these persons.

126. Ask of each person if, besides what he had already returned as his/her main activity against questions 16 (a) (i) or 16 (a) (ii), he/she participated in any secondary work. A number of unpaid family workers participating in the household enterprises, who might have returned themselves mainly as 'H' or 'ST' or 'R' under question 16 (a) (ii) for their main activity will be netted here for their economic activity which is subsidiary. Mere rendering of service for one's own home or production of goods for purely domestic consumption are not to be treated as economic activity. For example, a servant who works as a cook in his or her employer's home for wages will be considered economically active but, a housewife, even if she may work much more than a paid servant, in having to cook for the family or looking after the household will not be treated as economically active for the purpose of this classification. Similarly, women who may produce cloth on a loin loom at home for domestic consumption will not be treated as economically active unless the products are sold and the household derives an income. Participation in work that goes to augment the income of the household will only be treated as economic activity. A boy whose main activity is shown as a student under 16 (a) (ii), can have the secondary work of say, cultivation if he helped the head of the household in the family cultivation during some parts of the season. But if a girl student, whose main activity is shown as 'ST' under 16 (a) (ii), also helped in weaving cloth purely for domestic consumption on a loin loom at home, or helped in attending to household chores, she will not be treated as having any secondary work. Secondary work will be reckoned only if the person is engaged in some economic activity even if marginal in addition to whatever is the main activity under question 16. A person whose main activity is shown as, say, a clerk in a Government Office or a teacher under question 16, also attends to some cultivation by his direct supervision or undertakes some tuition, this will be shown as

secondary work under question 17. A person's **main activity** may be cultivation in question 16 and his subsidiary activity money lending in question 17. Again main activity may be agricultural labourer and subsidiary work sugar factory labourer and so on and so forth.

127. The instructions for the usage of abbreviations in categorising workers under 16 (a) (i) and filling in the details under 16 (b) to (f) will apply *mutatis mutandis* to question 17 (a) to (f), except that while question 16 (a) (i) will cover the main work, Q. 17 (a) is intended to cover secondary work which may be possibly part-time. It may also be noted that the non-working categories of activity will not be reported as secondary work under question 17.

128. A few slips showing specimen entries appear as Appendix VII (not reproduced in this volume) and some illustrations for recording answers against Q. 16 are given in Appendix VI. You are advised to study these specimen entries and illustrations before starting actual enumeration and also consult these and the instructions whenever you are in doubt in recording any answer during field operation.

LIST OF A FEW TYPICAL INDUSTRIES THAT CAN BE CONDUCTED ON A HOUSEHOLD INDUSTRY BASIS

(*see paras* 92—95)

Foodstuffs

Production of flour by village chakkis or flour mills, milling or dehusking of paddy, grinding of chillies, turmeric, etc., production of gur, khandsari, boora, etc., production of pickles, chutney, jams, etc., processing of cashew nuts, making of dried vegetables, manufacture of sweetmeats and bakery products, production of butter, ghee, etc., slaughtering and preservation of meat and fish, fish curing, etc., oil pressing ghani.

B-I Part A—Workers and Non-workers according to main activity classified by sex and age-groups

This is a basic economic table compiled on a cent per cent count and is similar to table B-I of 1961. Data relating to workers and non-workers have been presented sex-wise and broad age-groupe-wise. The workers are further classified into nine industrial categories based on the classification of industries in which they are employed. The data are presented separately for total, rural and urban areas of the State and districts.

The concepts adopted for workers and non-workers have been defined elaborately in the *preliminary note.* In 1961, the data were presented by four age-groups, viz., 0-14, 15-34 35-39 and 60 and over. In 1971 Census, the age-groups have been further increased and the figures shown for eight broad age-groups, viz., 0-14, 15-19, 20-24, 25-29, 30-39, 40-49, 50-59 and 60+. The increase in the age-groups for data presentation would be helpful to Demographers and Social Scientists.

The broad industrial categories of workers shown in this table are—

(i) Cultivators;

(ii) Agricultural Labourers;

(iii) Livestock, Forestry, Fishing, Hunting and Plantations, Orchards, and allied activities;

(iv) Mining and Quarrying;

(v) Manufacturing, Processing, Servicing and Repairs;

 (a) Household Industry;

 (b) Other than Household Industry;

(vi) Construction;

(vii) Trade and Commerce;

(viii) Transport, Storage and Communications;

(ix) Other Services.

"Mining and Quarrying" has been shown as a separate category-IV in 1971 while in 1961 it was included in Category III, i.e. Livestock, Forestry, Fishing, Hunting and Plantations. Household Industry which was a separate category (IV) in 1961 has now been included in the Category V. Manufacturing, Processing, Servicing and Repairs treating it as a sub-category (v a). The two sub-categories under industrial category V. Manufacturing, Processing Servicing and Repairs are (a) Household Industry and (b) Other than household Industry.

The basis of industrial classification in 1971 followed the same pattern as in 1961, viz., the nature of economic activity carried on in an establishment. A technical committee consisting of representatives of the Registrar General, India, Director-General of Employment and Training, Ministries of Internal Trade and Industry and the Central Statistical Organisation was constituted to work out a three degit level standard classification of Industries. This committee finalised the National Industrial Classification 1970, which has been adopted by the Registrar General for 1971 Census with few changes, Based on this Industrial Classification, the broad categories of Industrial workers have been formed and these categories are explained below.

Cultivators : The first classification of workers is Cultivator. For Census purpose an individual is treated as a Cultivator if he or she is engaged in cultivation directly or by supervision in the capacity of an owner or a lessee of land held from Government or as a tenant of land held from private persons or Institutions for payment of money, kind or share in the produce. It is not necessary that a person should own the land absolutely. Even if the land cultivated is held on lease or under a variety of tenures the person is regarded as a Cultivator. Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, ragi, etc., pulses, raw jute and kindred fibre crops, cotton, etc., and other crops such as sugarcane, groundnut, tapioca, etc., but does not include fruit growing, vegetable growing or keeping orchards or grooves or working in plantations like tea, coffee, rubber, cinchona, and other plants. A land owner who leases out his land for cultivation to others and gets a return in the shape of money, kind or share of crop and who does not even supervise or direct cultivation of land is not treated as a cultivator.

Agricultural Labourer : Any person who does not own any land or has not taken land from others on lease for cultivation but who works in another person's land for wages in money, kind or share is classified as an agricultural labourer. An individual who is working in the current cultivating season or worked in the last season in the previous year is deemed as an agricultural labourer.

Livestock, forestry, etc.: The third category relates to persons engaged in livestock, forestry, fishing, hunting and plantations, orchards and other allied activities. This includes production and rearing of livestocks, planting and conservation of forests, fishing in land, sea and coastal, rearing of fish and production of other plantation crops like tea, coffee, rubber, tobacco etc., and agricultural services like spraying pesticides, soil testing and conservation, horticultural and nursery services etc. The plantation crops are treated separately from cultivation.

Mining and Quarrying : This category includes min-, ing of coal, lignite, crude petroleum, natural gas, iron ore, manganese, gold, silver, etc., quarrying of stones, clay and sand pits, precious stones and semi-precious stones. Workers engaged in mining of chromite, bauxite, lead and zinc ores, ilmenite, mica, gypsum etc., are included in this category. Chemicals and fertiliser mineral mining like soda ash, sulphur, phosphate, nitrates etc., salt mining and quarrying including crushing, screening and evaporating in pans, mining of asbestos, quartz soap stone, natural abrasives other than sand graphite, etc., form part of this group. This category has been separatea as an independent category in 1971 Census.

Household Industry : A household industry is defined as an industry conducted by the head of the houschold himself and/or mainly by the members of the house-hold at home or within the village in rural areas, and only within the premises of the house where the house-hold lives in urban areas. The household industry should not be run on the scale of registered factory. Thus the four ingredients of a household industry are-(i) Nature of activity (ii) Participation (iii) Location, and (iv) Size. A household industry should relate to production, processing, servicing, repairing or making and selling, (but not merely selling) of goods. The head of the household and/or one or more members of the household must participate in such an industry. If it is run primarily by hired labourers, it is not a household industry. Even if hired workers partici-pate, the head and/or family members must be the main participants. The household industry should not be run on the scale of a registered factory.

Persons working in such household industry have been classified under the group "Household Industries".

Manufacturing etc., Industries other than Household Industry: The fifth category of workers also relate to Manu-facturing, Processing, Servicing and Repairs. While the workers in household industries are included in the previous category, this category includes all the workers employed in non-household industries. Workers engaged in the manufacture of food-stuffs, beverages, textile products, wooden products, paper products, leather products, rubber, petroleum and coal products, basic metals, transport equipments etc., manufacture of chemicals, alloys, machinery, machine tools, printing, publishing and allied industries as also miscellaneous manufactures are included under this category.

Construction : The sixth group of workers relates to those engaged in construction. This includes cons-truction and maintenance of roads, railways, bridges, tunnels, pipe lines, ports, harbours, run-ways, building, telegraph and telephone lines, water ways and water reservoirs including dams, canals, tanks, wells etc., construction of industrial plants as also hydro and thermal electric projects. Activities allied to construction like plumbing, installation of air-condi-tioning plants and lifts, fixing of doors, windows, panels, hand-pumps, painting and decorating, electri-cal installations are all covered by this category.

Trade & Commerce : This category covers all sorts of wholesale and retail trade as well as restaurants and hotels. Commercial activities like banking, money lending, stock, shares, etc., insurance, real estates, legal services and other business services fall under this category.

Transport, Storage & Communications : Workers engaged in transport, storage and communication work are grouped in this category. Transport by all modes like land, water, air etc., as also services incidental to transport such as packing, travel agencies etc., are included in this category. Ware-housing, storage and also all types of communications like postal, telegraphic, wireless and signal and telephone communications fall under this category.

Other Services : The ninth classification of workers viz., Other Services, includes workers in Government services, educational, medical, health, veterinary, per-sonal services, community services and general and casual labourers who do not have any fixed place of work. Recreational and cultural services, scientific and research services as also sanitary services are covered by this category. Persons engaged in laun-dries, cleaning and dyeing, hair-dressing, portrait and commercial photographic studios are also covered by this group. Workers engaged in generation, transmission and distribution of electric energy to domestic, industrial and commercial users and those in the manufacture and distribution of gas and water supply are grouped under this category.

Non-workers : Persons not coming under the defi-nition of workers and who are essentially non-workers under question 16 viz., Main activity of the individual slip have been classified as non-workers. The non-workers mainly fall under seven groups consisting of persons engaged in household duties, students, re-tired persons or rentiers, dependants like infants and disabled persons, beggars or vagrants or independent women, convicts in jails or inmates of penal, mental or charitable institutions and persons who do not come under any of the groups listed above but who are seeking employment.

Distribution of 1,000 persons into workers and non-workers by sex and for total, rural and urban areas of Pondicherry Union Territory is shown below:—

Area	Persons	Males	Females
1. *All Areas*			
Total population	1,000	1,000	1,000
Workers	299	487	109
Non-workers	701	513	891
2. *Rural Areas*			
Total population	1,000	1,000	1,000
Workers	330	517	140
Non-workers	670	483	860
3. *Urban Areas*			
Total population	1,000	1,000	1,000
Workers	256	444	68
Non-workers	744	556	932

29.9% of the population are workers as against 70.1% constituting non-workers. The workers percentage is higher in Pondicherry rural areas (33.0%) as compared to urban areas (25.6%). In the Union Territory as a whole, 48.7% are workers among the males against 10.9% among females. The proportions of male workers in rural and urban areas are 51.7% and 44.4% respectively. Among females, workers form 14.0% in rural areas and 6.8% in urban areas. Proportion of workers is lower in the urban sector as compared to rural sector.

The statement below shows the percentage of workers by sex and Industrial categories

Industrial Category	Persons	Males	Females
Total workers	100.0	100.0	100.0
(i) Cultivators	11.8	14.0	2.2
(ii) Agricultutal Labourers	32.8	26.4	61.9
(iii) Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied Activites	5.1	6.0	1.0
(iv) Mining & Quarrying	0.2	0.2	N
(v) Manufacturing, Processing Servicing & repairs -			
(a) Household Industry	1.8	1.7	2.2
(b) Other than Household Industry	16.1	18.4	5.6
(vi) Construction	3.2	3.6	1.1
(vii) Trade and Commerce	11.1	11.7	8.0
(viii) Transport, Storage & Communications	2.5	3.1	0.1
(ix) Other Services	15.4	14.9	17.9

'N' denotes negligible figures.

Cultivators and agricultural labourers together with workers in livestock, forestry, fishing etc., and mining and quarrying constitute 49.9% of all workers. Manufacturing including household industry engages 17.9% of workers. Workers under Other Services constitute 15.4% of all workers.

TABLE B-I PART B

FEMALE WORKERS AND NON-WORKERS ACCORDING TO MAIN ACTIVITY CLASSIFIED BY MARITAL STATUS AND AGE-GROUPS

FLY LEAF

B-I—Part-B:—*Female workers and non-workers according to main activity by marital status and age-groups*

This table is an innovation of 1971 Census. Data in respect of female workers and non-workers have been furnished by marital status and eight broad age-groups. The workers have been classified by the nine industrial categories. The age-groups presented in this table correspond to Table B-I Part-A. This table will be of interest with the increasing participation of female workers in the country's economy. This table presents data for total, rural and urban areas at Union Territory level.

The following statement shows the distribution of 1,000 female population into workers and non-workers and sub-classified by marital status—

Workers/ Non-workers	Total female population	Marital status

TABLE B-II

WORKERS AND NON-WORKERS IN CITIES AND NON-CITY URBAN AREAS ACCORDING TO MAIN ACTIVITY CLASSIFIED BY SEX AND AGE-GROUPS

FLY LEAF

B-II *Workers and Non-workers in Cities and Non-City Urban areas according to main activity classified by sex and age-groups*

This table is similar to Table B-I Part -A the difference being that while B-I Part-A presents data for total, rural and urban areas of each area, this table gives data for each City/City Agglomeration, non-city urban areas of district and town/town Agglomeration.

In earlier censuses prior to 1961, there was no differentiation between rural and urban areas of this Union Territory. In 1961 Census, classification of area into town and village was first attempted in this Union Territory. For 1971 Census the following criteria were adopted for treating a place as urban—

(a) All Places with a Municipality, Corporation or Cantonment or notified town area;

(b) All other places which satisfied the following conditions—

(i) Minimum population of 5,000;

(ii) At least 75% of the male working population was non-agricultural;

(iii) A density of at least 400 per Sq, Km. (1000 persons per Sq. Mile)

Some of the places which do not combinedly possess all the above characteristics but satisfied only one or two conditions but certainly possessed urban characteristics have also been declared as urban in consultation with the State Government.

Urban Agglomeration is a new concept adopted for 1971 Census. In several areas around a core city or statutory town, have come up fairly large well recognised railway colonies, university campuses, port areas, military camps, etc., and even though these are outside the statutory limits of a Corporation, Municipality or Cantonment they fall within the revenue boundary of the place by which the town itself is known. It may not be altogether realistic to treat such areas lying outside the statutory limits of town as rural units and at the same time each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit. Such areas deserve to be reckoned along with the main town and the continuous spread including such urban outgrowths would deserve to be treated as an integrated urban area. This continuous spread is termed as Urban Agglomeration at the 1971 Census. There are different situations in which urban agglomerations would be constituted as for e.g.

(a) A city with continuous outgrowth (the part of outgrowth being out of the statutory limits but falling within the boundaries of the adjoining village or villages);

(b) One town with similar outgrowth of two or more adjoining towns with their outgrowths as in (a); and

(c) A city and one or more adjoining towns with their outgrowth, all of which forming a continuous spread.

There is only one urban agglomeration in this Union Territory. The towns of Pondicherry, Mudaliarpet, and Ozhukarai (excluding Pillaichavadi portion) constitute "Pondicherry Urban Agglomeration". There are no cities in Pondicherry. However, the population of Pondicherry Urban Agglomeration exceeds 1,00,000.

There are six towns in Pondicherry Union Territory in 1971 Census. Out of the six towns, three towns are in Pondicherry Area. There is one town in each of the other three areas. Muthialpet of Pondicherry Area which was a separate town in 1961 Census has merged with Pondicherry town and the entire Pondicherry Commune has thus become a single urban unit in 1971. All the Towns are Municipalities.

B-III— *Parts A & B—Classification of workers and non-workers according to main activity by educational levels in Urban/Rural areas only*

This table is similar to the table B-III of 1961 Census and gives data on educational attainments of the population of the Union Territory and its constituent areas. The table is presented in two parts. Part-A presents data for urban areas and Part-B, data for rural areas. The table gives the classification of workers and non-workers of each sex into different educational levels. Workers are distributed into nine industrial categories. The figures for illiterates and literates have been presented separately. The literates in urban areas have been further classified into 13 educational levels. They are—(1) Literates (without educational level) (2) Primary (3) Middle, (4) Matriculation or Higher Secondary (5) Non-Technical Diploma or Certificate not equal to degree, (6) Technical Diploma or Certificate not equal to degree, (7) Graduate degree other than Technical degree, (8) Post Graduate degree other than Technical degree, (9) Technical degree or Diploma equal to degree or post graduate degree sub-classified under (i) Engineering and Technology, (ii) Medicine, (iii) Agriculture, (iv) Veterinary and Dairying, (v) Teaching and (vi) Others.

In the case of rural areas, the literates have been grouped under seven educational levels. The levels adopted are—

1. Literate without educational level;
2. Primary;
3. Middle;
4. Matriculation or Higher Secondary;
5. Non-technical diploma or certificate not equal to degree;
6. Technical diploma or certificate not equal to degree and;
7. Graduate and above.

In the census classification, the term 'literate' denotes a persons who is able both to read and write with understanding in any language. A person who can merely read but cannot write is an illiterate. No minimum educational standard or attendance in school is insisted upon. The literates include all persons who have an educational qualification as well as those who have no educational qualification but satisfy the above condition.

This table will be helpful to assess the educational standards of available manpower in each category of worker as well as the educational standards of non-workers. The distribution of 1,000 persons into workers and non-workers by Educational levels and sex separately for rural and urban areas is given below:—

Table B-IV—Industrial Classification of Persons at work other than Cultivation as main activity

FLY LEAF

B-IV—Part A : Industrial classification of persons at work other than at Cultivation as main activity by sex and Divisions, Major Groups and Minor Groups

Table B-IV gives detailed data on workers other than at cultivation in the different industrial sector in four parts. Part-A presents the distribution of population at work other than at cultivation by Division, Major Groups and Minor Groups of the National Industrial Classification, 1970. The data are presented for the Union Territory and each of the four areas for all areas and urban areas.

An Appendix is supplemented to this table giving more details in respect of workers engaged in Manufacturing, Processing, Servicing and Repairing classified by Household and Non-household Industry. This is similar to Table B-IV Part C of 1961.

As already discussed in the fly leaf to Table B-I, the establishment is the unit on the basis of which the industrial classification of workers has been made. The self employed persons have been grouped under the Industry to which their activity relates. All others have been grouped under the Industry in which they are employed, the basis of classification being the nature of economic activity carried on in an establishment. As per National Industrial Classification, 1970, code numbers have been assigned for all Industrial groups under the digit system. Based on the international usage, three digit code numbers have been adopted. The entire economic activity has been divided into nine divisions, the division being represented by the first digit of the code number. Each division has been divided into major groups not exceeding ten. There are 66 major groups which are indicated by the two digit code number. Each major group has further been divided into minor groups not exceeding ten and the minor groups is indicated by the three digit code numbers. Thus there are 386 minor groups. The complete list of National Industrial Classification, 1970 as adopted for 1971 Census is given as an appendix to this fly leaf. Divisions 2 & 3 are treated as one as both of them relate to manufacturing and repair.

B-IV—Part B : Industrial Classification of workers in Manufacturing, Processing, Servicing and Repairs on Household Industry basis as main activity by sex and class of workers

This table presents data on workers at Household Industry for rural and urban areas by sex for the Union Territory as a whole. The workers are further classified by class of workers i.e. Employees and Single workers. Information has been furnished in this table for Division, and Major Groups. This table is similar to Table B-IV-Part -A in 1961 Census, the only difference being that in 1971 information in respect of two classes of workers, viz., Employees and Single workers alone have been presented. The number of family workers is not presented but can be derived from the table itself.

The term status of worker or class of worker denotes the position of the worker in the industrial activity, as to whether he is an employer, employee, a single worker or a family worker.

Employer : A person who conducts his own economic enterprise and employs other persons to get the work done is an employer. Such a person is not only responsible for his own work, but also for the work of others working under him. A person who is himself employed by some one even if he has the power to appoint any other persons will not be called an employer. Similarly the persons who employs domestic servants for household duties or employees subordinates in offices where he is himself employed by others do not fall under the category of employer.

Employee : An employee is a person who usually works under some other person for salary or wages in cash or kind. There may be persons who are employed as Managers, Superintendents, Agents, etc., and in that capacity employ or control other workers on behalf of their own employers. Such persons are only employees.

Single Worker : A person who normally works by himself is a single worker. He is not employed by any one else and in turn does not employ anybody else not even members of his family except casually. A person who works in a joint partnership with one or several persons will be also called a "Single Worker". Each member of a producers Co-operative Society engaged in work also will be a "Single Worker".

Family Worker : A family worker is a member who works without receiving wages or salary in cash or kind in an industry, business or trade or service conducted by the family. Members of the household who help solely in household duties is not treated as family worker. For the purpose of this definition, members of a family may be drawn from beyond the limits of the household by ties of blood or marriage. The family worker may not be entitled to a share of the profits in the work of the business carried on either by the person or Head of the household or other relative.

10—1 Census/TN & P/75

The concept of Household Industry and other concepts relating to the worker have been explained in Fly leaf table B-1. The definition for urban area will be seen in Fly Leaf to Table B-II.

B-IV—Part-C : Industrial classification of workers in Non-Household Industry, Trade, Business, Profession or Service as Main Activity by class of worker, age and sex

This table presents data on workers engaged in Non-Household Industry, Trade, Business, Profession or Service as main activity classified by Class of worker, viz., Employers, Single workers and Family Workers. Information is furnished by age groups, viz., 0—14, 15—19, 20—24, 25—29, 30—39, 40—49, 50—59, 60+ and age not stated, for Total and Urban areas of the Union Territory.

B-IV—Part-D : Industrial Classification by sex and class of workers of persons at work in Non-Household Industry, Trade, Business, Profession or service as main activity.

This table is similar to the Table B-IV-Part-B published in 1961 Census. Information is furnished for workers engaged in Non-Household Industry, Trade, Business, Profession or Service as main activity classified by status of worker. Distribution of workers has been made by Division and Major groups and presented for Total and Urban areas for the Union Territory and its four areas.

	317	Manufacture of matches.
	318	Manufacture of explosives and ammunition and fire works.
	319	Manufacture of chemical products not elsewhere classified (including photo-chemicals, sensitised films and paper).
32		**Manufacture of Non-Metallic Mineral Products**
	320	Manufacture of Structural clay products.
	321	Manufacture of glass and glass products.
	322	Manufacture of earthen ware and earthen pottery.
	323	Manufacture of china-ware and porcelainware.
	324	Manufacture of cement, lime and plaster.
	325	Manufacture of mica products.
	326	Manufacture of structural stone goods, stone dressing and stone crushing, stone ware.
	327	Manufacture of earthen and plaster statues and other produts.
	328	Manufacture of asbestos, cement and other cement products.
	329	Manufacture of miscellaneous non-metallic mineral products, such as slate products, abrasives, graphite products, mineral wool, silica products and other non-metallic mineral products not elsewhere classified.
33		**Basic Metal and Alloys Industries**
	330	Iron and Steel industries.
	331	Foundries for casting and forging iron and steel.
	332	Manufacture of ferro-alloys.
	333	Copper manufacturing.
	334	Brass Manufacturing.
	335	Aluminium manufacturing.
	336	Zinc manufacturing.
	339	Other non-ferrous metal industries.
34		**Manufacture of Metal Products and Parts except Machinery and Transport Equipment**
	340	Manufacture of fabricated metal products such as metal cans from tin-plate, terne plate or enamelled sheet metal, metal shipping containers, barrels, drums, kegs, pails, safes, vaults, enamelled, sanitary and all other fabricated metal products not elsewhere classified.
	341	Manufacture of structural metal products.
	342	Manufacture of furniture and fixtures primarily of metal.
	343	Manufacture of hand tools and general hardware.

Major Group	Minor Group	Description
		Division 2 & 3—Manufacturing and Repair—Contd.
	344	Enamelling, japanning, lacquering, galvanising, plating, and polishing metal products.
	345	Manufacture of metal utensils cutlery and kitchenware.
	349	Manufacture of metal products except machinery and transport equipment not elsewhere classified, like type-founding.
35		**Manufacture of Machinery, Machine tools and Parts except Electical Machinery**
	350	Manufacture of agricultural machinery and equipment and parts.
	351	Manufacture and repair of drills, coal cutting machines, earth moving, lifting and hoisting machinery, cranes, conveyors and road rollers and other heavy machinery and equipment used by construction and mining industries.
	352	Manufacture of prime movers, boilers and steam generating plants such as diesel engines and parts.
	353	Industrial Machinery for Food and Textile Industries.
	354	Industrial Machinery for other than Food and Textile industries.
	355	Manufacture of Refrigerators, Airconditioners, and Fire Fighting Equipment, and other parts, components and accessories.
	356	Manufacture, alteration and repair of general items of non-electrical machinery, components equipment and accessories not elsewhere classified, e.g., manufacture and repair of size reduction equipment like Pentagraph, Mapograph etc., crushers, conveyors, bucket elevators, ship hoist cranes, derricks, etc. mixers and reactors, centrifugal machines, driers, etc., power driven pumps, etc. air gas, compressors and vacuum pumps (excluding electrical furnaces), etc.
	357	Manufacture of Machine Tools, their parts and accessories.
	358	Manufacture of office computing and accounting machinery and parts.
	359	Manufacture, and repair of non-electrical machinery, equipment, components and accessories not elsewhere classified, (such as sewing machines, automatic merchandising machines, washing, laundry, dry-cleaning and pressing machines, cooking ranges and ovens, other service industustry machines, arms and armaments etc.).
36		**Manufacture of Electrical Machinery, Apparatus, Appliances and Supplies and Parts**
	360	Manufacture of electrical industrial machinery and apparatus and parts (such as electrical motors, generators, transformers, electro-magnetic clutches and brakes etc.).
	361	Manufacture of insulated wires and cables.
	362	Manufacture of dry and wet batteries.
	363	Manufacture of electrical apparatus, appliances and their parts such as lamps, bulbs, tubes, sockets, switches, fans, insulators (except porcelain), conductors, irons, heaters, shavers, vacuum cleaners, etc., excluding repairing.

Major Group	Minor Group	Description
		Division 2 and 3—Manufacturing and Repair—Contd.
36	364	Manufacture of radio and television transmitting and receiving sets including transistor radio sets, sound reproducing and recording equipments including tape recorders, public address systems, gramaphone records and pre-recorded magnetic tapes, wire and wireless, telephone and telegraph equipment, signalling and detection equipment and apparatus, radar equipment and installations; parts and supplies specially used for electronic apparatus classified in this group.
	365	Manufacture and repair of Radiographic X-ray apparatus and tubes and parts.
	366	Manufacture of Electronic Computers, Control Instruments and other Equipment.
	367	Manufacture of electronic components and accessories not elsewhere classified.
	369	Manufacture of electrical machinery, apparatus, appliances and supplies and parts not elsewhere classified.
37		**Manufacture of Transport Equipment and Parts**
	370	Ship building and repairing.
	371	Manufacture of Locomotives and parts.
	372	Manufacture of Railway wagons and coaches and parts.
	373	Manufacture of other rail-road equipment
	374	Manufacture of motor vehicles and parts.
	375	Manufacture of motor-cycles and scooters and parts.
	376	Manufacture of bicycles, cycle-rickshaws and parts.
	377	Manufacture of aircrafts and its parts.
	378	Bullock-carts, . push-carts, hand carts, etc.
	379	Manufacture of transport equipment and parts not elsewhere classified.
38		**Other Manufacturing Industries**
	380	Manufacture of medical, surgical and scientific equipment.
	381	Manufacture of photographic and optical goods (excluding photo chemicals, sensitised paper and film).
	382	Manufacture of watches and clocks.
	383	Manufacture of jewellery and related articles.

TABLE B-V

PART A

OCCUPATIONAL CLASSIFICATION BY SEX OF PERSONS AT WORK ACCORDING TO MAIN ACTIVITY OTHER THAN CULTIVATION

PART B

OCCUPATIONAL CLASSIFICATION BY SEX AND CLASS OF WORKERS IN NON-HOUSEHOLD INDUSTRY TRADE, BUSINESS, PROFESSION OR SERVICE AS MAIN ACTIVITY

19—1 Census/TN&P/ND/75

FLY LEAF

B-V—Part A —*Occupational classification by sex of persons at work according to main activity other than cultivation.*

B-V—Part B —*Occupational classification by sex and class of worker in Non-Household Industry, Trade, Business, Profession or Service as Main Activity.*

This is one of two tables presenting data for workers by occupation. The other table is B-VI which gives the occupational distribution of persons at work according to main activity other than Cultivation classified by sex and age-group/educational level. This table provided data on occupational distribution of workers engaged in non-agricultural activities cross classified by broad industrial categories class of worker separately for each sex. The data relates to the main activity of workers only. This table gives figures only at the State level. Data are presented at the State level for Total (Urban and Rural areas combined) and urban separately.

B-V table consists of two parts. Part-A gives data on the distribution of workers in occupational divisions, groups and families cross classified by the industrial categories. This classification follows the pattern adopted in 1961 Census. The term 'industry' denotes the sector of economic activity in which the worker is engaged; while 'occupation' connotes the exact function or work that an individual performs in that sector. Occupations are classified according to the three digit code structure of the National Classification of occupations (1968) — the first digit represents the division, the first two digits represent the group and three digits the family. There are 8 occupational divisions, 95 groups and 462 families in the National Classification of Occupations. Occupational families 610—Cultivators (Owners), 611—Cultivators (Tenants) and 630—Agricultural Labourers are excluded from Divison 6 as they relate to workers in cultivation (industrial categories I and II) from the scope of this table. So also in Division X, groups X-0—New workers seeking employment and group X-9—Workers not reporting any occupation are excluded as they relate to non-workers.

In Part B of this table, the distribution of workers engaged in non-household industry, trade, business, profession or service is given according to occupational division and group cross classified by the status or class of worker-Employer, Employee, Single worker and Family worker. The description of the 'class of workers' have been given in the fly leaf to Table B-IV.

The code structure along with the description of the occupational division, group and family of the National Classification of Occupations (1968) is presented in the Appendix.

B-VI—*Occupational classification of persons at work according to main activity other than cultivation classi fied by sex*

(Cross tabulated by age-groups educational levels)

This table is a companion table to B-V and gives statistics on the occupational distribution of workers other than those engaged in cultivation (industrial categories I and II) by sex. The figures are presented for each division and group of the National classification of Occupations (1968).

There are two parts—Part-A and Part-B. Each part has two sub-parts—(i) and (ii). Part-A relates to workers in *urban ares* only, while Part-B deals with workers in Rural Areas only. Sub-Part (i) gives figures of workers other than at cultivation for each occupational division and group classified by 9 broad age-groups of 0—14, 15—19, 20—24, 25—29, 30—39, 40—49, 50—59, 60+and age not stated. The age-groups adopted in this table are the same as in Table B-I Part-A. Sub-Part (ii) gives the data on workers other than those at cultivation for each occupation divisionand group classified into the various educational levels. The educational levels for which data are presented are similar to those found in Table B-III-Part-A in respect of urban areas and those in Table B-III Part-B for rural areas. Illiterate workers are not shown but can be arrived at by substracting the total literate workers from the total workers.

In 1961 Census, occupational details of workers other than cultivation was cross-classified for educational levels for urban areas only. In this Census, in addition to educational levels, age-group-wise classification has been introduced and data have been presented for rural areas also.

This Table will give an idea of the educational levels of workers in different non-agricultural occupations as well as their distribution by broad age-group. This will help in formulating plans for workers education in different occupations requiring skill.

TABLE B VII

SECONDARY WORK i.e. PERSONS HAVING MAIN ACTIVITY (i) CULTIVATORS (ii) AGRICULTURAL LABOURERS (iii) HOUSEHOLD INDUSTRY (iv) NON-HOUSEHOLD INDUSTRY, TRADE, BUSINESS OR SERVICE AND (v) NON-WORKERS CLASSIFIED BY SEX AND BY SECONDARY WORKS

(i) CULTIVATORS (ii) AGRICULTURAL LABOURERS (iii) HOUSEHOLD INDUSTRY (iv) NON-HOUSEHOLD INDUSTRY, TRADE, BUSINESS OR SERVICE

B-VII—*Secondary work i.e. persons having Main Activity (i) Cultivators, (ii) Agricultural Labourers (iii) Household Industry (iv) Non-household Industry, Trade, Business or Service (v) Non-workers classified by sex and by secondary work (i) Cultivators, (ii) Agricultural Labourers, (iii) Household Industry and (iv) Non-household Industry, Trade, Business or Service*

This table presents data about persons who have some secondary work apart from their main activity. Main activity is the one in which a person spends his time mostly. According to the answer given to the question, 'what is his/her main activity?' a person will be considered as a worker or non-worker. A worker is a person whose main activity is participation in any economically productive work by his physical or mental activity. Works involves not only actual work but effective supervision and direction. A person whose main activity is not participation in any economically productive work is considered as a non-worker. The concepts of worker and non-worker have been given in detail in the Preliminary Note.

In addition to the main activity returned, if a person also participates in some other economic activity, such participation is considered as secondary work. A person whose main acitivity is Cultivation may also be engaged in cotton handloom weaving, in this case cotton handloom weaving is his secondary work. So also, a person whose main activity categorises him as a non-worker may also participate in any productive work; (e.g.) a student may also participate in assisting his father in making toys and dolls. In that case, the student who is a non-worker by main activity has secondary work of toy-making.

Statistics has been furnished in the Table for the Union Territory and its four areas with rural and urban break-up and for males and females separately. Those persons having their main activity as Cultivator, Agricultural Labourers, working at Household Industry, at Non-Household Industry, Trade, Business or Service and Non-workers are further cross-tabulated for secondary work in either (i) Cultivation (ii) Agricultural Labour or (iii) Household Industry or (iv) Non-household Industry, Trade, Business, Service etc.

In an Appendix to this table, data are presented for persons who are having secondary work in non-household industry, trade, business or service at two digit level of the National Industrial Classification, 1970 and cross-classified by their main activity. Main activity of those engaged in Non-household Industry, trade, business or service are shown at one digit (division) level of the N.I.C. and of non-workers in three broad categories—Household work, students and all other non-workers.

In 1961, information on Secondary work was furnished in respect of persons working mainly as Cultivator, Agricultural Labourer or at Household Industry in anyone of the above activities. In respect of persons having main activity in Manufacturing, Trade, Business or Service, data on secondary work was furnished only for those having secondary work at household industry. The method of presentation has been changed in 1971 Census and information in respect of non-workers (whose main activity is something which is not economically productive) who also have a secondary work has been presented.

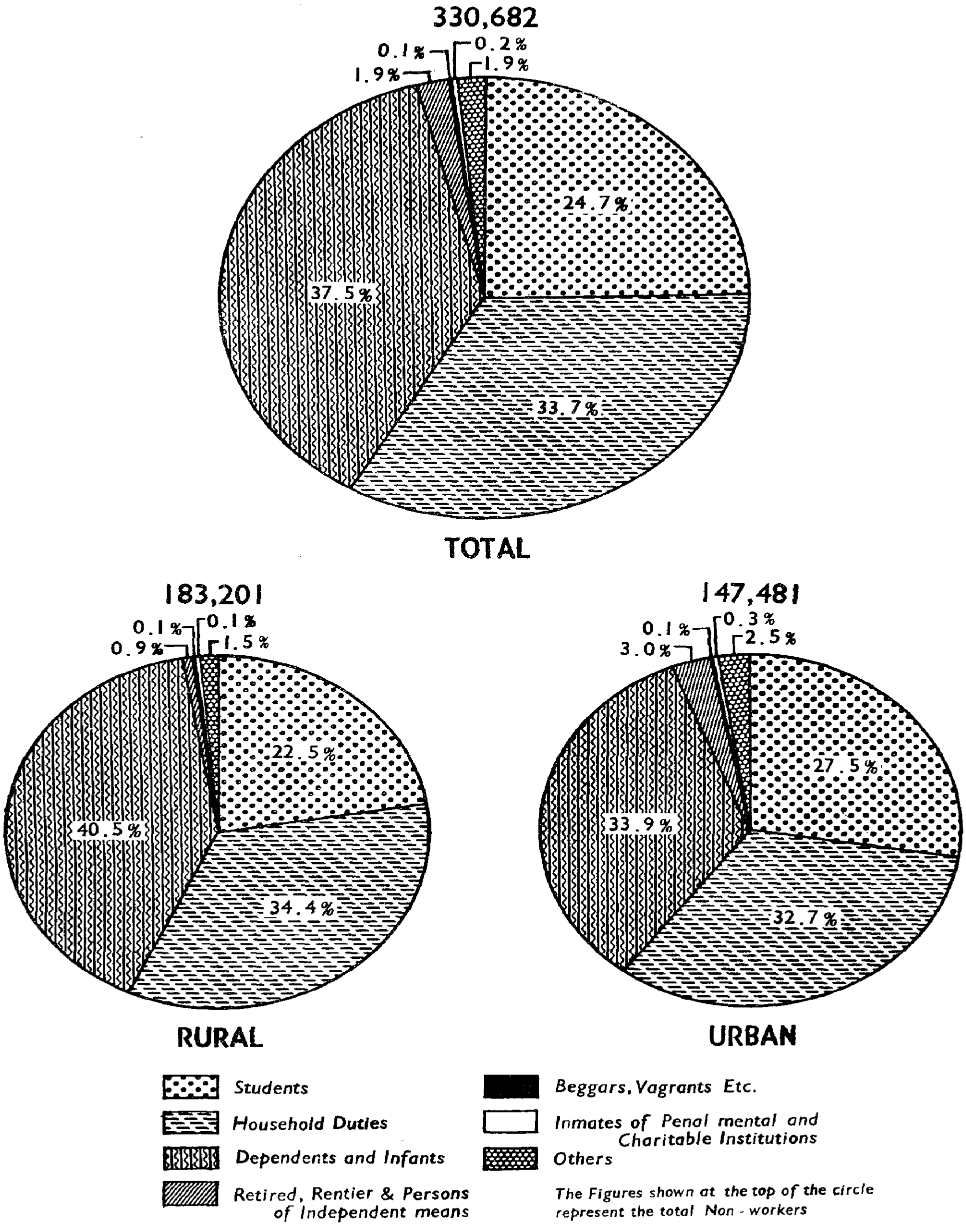
TABLE B-VIII

PERSONS CLASSIFIED AS NON-WORKERS ACCORDING TO MAIN ACTIVITY CROSS-CLASSIFIED BY SEX, AGE-GROUPS AND TYPE OF ACTIVITY

43—1 Census/TN & P/75

DISTRIBUTION OF NON - WORKERS BY TYPE OF ACTIVITY
(UNION TERRITORY OF PONDICHERRY)



B-VIII—*Persons classified as Non-workers according to main activity cross classified by sex, age-groups and type of activity*

This table presents data in respect of non-working population. Particulars have been furnished for males and females and for total rural and urban areas separately for the Union Territory and its four areas. The non-workers have been shown under nine broad age-groups 0—14, 15—19, 20—24, 25—29 30—39, 40—49, 50—59, 60+ and age not stated.

For the first time in 1961 Census, detailed information in respect of non-workers was published. The present table is almost similar to the 1961 table—B-IX. The changes introduced are (1) there are 7 types of non-workers as against 8 types in the 1961 table (2) the non-workers are shown under 9 broad age-groups now as against 5 broad age groups in 1961 and (3) figures were shown separately for never-employed and unemployed in 1961 while there is only one residuary type—"Others" The type "Others" will correspond to the never-employed and unemployed persons of 1961.

The classification of the population into two broad categories of "worker" and "Non-worker" based on the main activity of each individual has been explained earlier.

In 1971 Census, the non-workers have been classified under seven broad types based on their activity.

1. Household duties
2. Students
3. Retired persons or Rentiers
4. Dependants
5. Beggars
6. Inmates of Institutions
7. Other Non-workers

1. *Household duties :* Any person who is basically engaged in unpaid home duties like the household chores is included in this type. If a woman works mainly on household chores but also engages in some other economic activity like family cultivation, her main activity is household duties and her economic activity, viz., cultivation is her secondary work. On the other hand, if she works primarily at a factory or plantation and also attends to household duties, she will be considered as a worker and will not come under this type.

2. *Students :* All full time students and children attending school are included in this group. If the student helps casually in family cultivation or houschold industry, trade or business he will be treated as a non-worker of the student type with secondary work.

3. *Retired persons or rentiers :* Any person who has retired from service and is doing no other work or is not re-employed is included in this group. This group includes persons who are living mainly on the income received through rent or agricultural or non-agricultural royalty or dividend without doing work as also persons of independent means for securing which they do not have to work.

4. *Dependents :* All infants and children who are not attending school or persons who are permanently disabled and cannot work due to illness or old age come under this type. Dependents also include all non-workers who have no other activity coming under any of the types of non-workers and who are not seeking any work but are purely dependent.

5. *Beggars :* All beggars, vagrants and others like independent woman who cannot indicate their source of income and those of unspecified sources of subsistence and who are not engaged in any economically productive work come under this type.

6. *Inmates of Institution :* All persons who are inmates of penal institutions like jail, borstal school, mental institutions like mental hospital or charitable institutions like poor-home, orphanage etc., are included in this group. However an under-trial prisoner who has not been convicted by a Court of Law is not included in this group but he will be indicated according to the main activity he was engaged in before he was apprehended.

7. *Other non-workers :* All other non-workers who are not included in any of the 6 groups specified above are classified under this group. This group will mainly consist of unemployed persons (those seeking work for the first time and those previsouly employed but now out of work and seeking employment).

The statement below shows the distribution of non-workers by 7 broad types, as well as by the broad age-group.

NON-WORKERS CATEGORISED AS OTHERS AGED 15 AND ABOVE CLASSIFIED BY SEX, AGE-GROUPS AND EDUCATIONAL LEVELS IN URBAN AREAS ONLY

PART B

NON-WORKERS CATEGORISED AS OTHERS AGED 15 AND ABOVE CLASSIFIED BY SEX, AGE-GROUPS AND EDUCATIONAL LEVELS IN RURAL AREAS ONLY

FLY LEAF

B-IX --NON-WORKERS CATEGORISED AS "OTHERS" AGED 15 AND ABOVE CLASSIFIED BY SEX, AGE-GROUPS AND EDUCATIONAL LEVELS

This table covers largely the unemployed persons who do not come under the other specified categories of non-workers such as Housewives, Students, Dependents etc. This table has been prepared in two Parts—Part-A dealing with urban areas and Part-B with rural areas. Part-A is more detailed than Part-B. In both Parts, data relating to other non-workers aged 15 and above have been presented for males and females separately classified by certain specified age-groups and educational levels. In Part-A which deals with urban areas, the educational levels are same as those adopted in Table B-III-Part A and in the case of Part-B, the educational levels shown are those adopted in Table B-III-Part-Part-B. The age-groups adopted are 15-19, 20-24, 25-29 and 30+. The age-groups presented are different from those shown in Tables B-I, B-II etc. As the data presented in this table will mostly represent unemployed persons by educational levels, these age-groups are significant. The table will throw light on the extent of educated unemployed in the country. The table presents data at the State level only.
